

HYDROGEN WATER: IMPROVES QUALITY OF LIFE

KYK Hydrogen Water | 1,500 PPB of DH | KYK Co., Ltd. (South Korea)

-Hydrogen Water?

Hydrogen water is simply pure water with extra hydrogen molecules added to it. Hydrogen (H_2) is the most abundant molecule in the universe. It's an odorless, colorless, and tasteless gas. H_2 acts as an antioxidant and protect the body from free radicals.

Water molecules consist of two hydrogen atoms and one oxygen atom. However, there isn't any free hydrogen molecules that can be used by the body as it is bound to oxygen. Therefore, infused

water with additional hydrogen produces benefits that plain water cannot deliver.

Hydrogen is the smallest existent gas molecule. Because of this unique property, molecular hydrogen could penetrate into virtually every organ and cell in the body (including the brain) where it has antioxidant, anti-inflammatory, weight-loss, and anti-allergy activity. Molecular hydrogen seems like the perfect therapeutic the world has been eagerly searching for – with virtually no side effects.

-Is Hydrogen water safe?

Hydrogen gas is NOT a foreign substance but it is natural to the body because after a fibre-rich meal, our gut bacteria can produce liters of hydrogen on a daily basis.

There are thousands of clinical papers validating the health benefits of hydrogen water. It can benefit all organs in the body as molecular hydrogen can cross blood-brain-barrier, selectively neutralize the damaging ROS / free radicals and become water to be eliminated from the body.

-Health Benefits of Hydrogen Water

1. Reduce fatigue & boost vitality
2. Remedy for allergies
3. Promote cardiovascular & cerebrovascular health
4. Cancer prevention & treatment
5. Improve diabetes
6. Anti-inflammation
7. Prevent & Reverse Degenerative Diseases
8. Anti-Aging
9. Slimming
10. Improve memory & cognitive function.

Regardless the name of the diseases such as arthritis, dermatitis, Parkinson's Disease, lupus, depression, anxiety and others. All degenerative diseases are caused by too high levels of oxidative stress with excessive ROS that damages our cells and DNA. Molecular hydrogen (H₂) is 88 times smaller than vitamin C, due to its tiniest size and the capability of crossing blood-brain-barrier, it can effectively scavenge free radicals and promote cellular health and overall health.
