KYK : Alkaline Water & Hydrogen water

Smart Water. Medical Power.

Medical-Grade Water. Smart Science. Real Results..

Different Technology Makes Different Water.

KYK® Corp India Pvt. Ltd. | KYK Co., Limited - South Korea
Website: www.kykindia.com E-mail: info@kykindia.com Tel: 1800-102-0908
Address: Suite 505-506, DLF Corporate Towers, Shivaji Marg, New Delhi - 110015

KYK Co., Limited | Since 1980

Kim, Young-Kwi

Founder Research Director Inventor

Water can shape illness. Water can shape health.

Medicine has advanced significantly, yet one question persists: why are we still falling ill? Young-Kwi Kim began with this question and turned his attention not to treatment, but to water. That perspective marked the beginning of his work in water science. Young-Kwi Kim is recognized as a leading water scientist and a pioneering inventor in the water industry. His contributions to water science and technology were formally acknowledged when he was awarded the Presidential Order of Merit for Invention in Korea.

Why did you begin researching water?

Kim's research began in 1980 with a fundamental question rooted in natural science. Among the Many approaches to health, water occupies the largest proportion of the human body. If the foundation of the body is to change, he believed, water must come first. Over decades of research and development, he has earned 21 gold medals at international invention exhibitions, and his work has been further supported through clinical research conducted in collaboration with Seoul National University Hospital. Kim respects the value of modern medicine while recognizing that treatment alone is not enough. Medicine addresses disease, but health is shaped by daily life and repeated choices. To him, water consumed multiple times every day is the quietest yet most powerful of those choices.

KYK's Philosophy and Business Vision

In the post-pandemic era, health has become a fundamental industry rather than a matter of personal preference. As individuals take greater responsibility for their own well-being, the demand for sustainable and trustworthy health solutions has grown more distinct. Guided by this global shift, Kim envisions KYK's water health business as a central pillar of the modern health industry—one built on water as the foundation of everyday life. KYK's water is not medicine, but a pathway toward healthier habits and long-term balance.

KYK : Innovating Water Science Since

1980

A Beginning in Water : KYK

Founding year marking the start of KYK's pursuit of advanced water science.

1996

GMP Recognition
for manufacturing process.

2008

International Recognition
Proven excellence with the German International Invention Award.

2011

Industrial Contribution
Honored with the Steel Tower Industry Medal for advancing national water technology.

2026

The Journey Continues

KYK strengthens its Global presence with next-generation Medical-Grade Water systems.

2004

National Recognition
Awarded the Jang Yeong-sil Gold Medal, Korea's highest honor for scientific innovation.

2010

Global Validation
Gold Medal at the Geneva International Exhibition, placing KYK among the world's top innovators in water technology.

2019

A Natural Evolution
Expanding Innovation from industry to environmental responsibility and ESG leadership.

KYK Medical-Grade Water, Engineered Over Time

A question that began with water became technology, and over time, trust. With medical-grade water, KYK brings innovation closer to life. Alkaline Hydrogen Water can be made, but completion is proven by technology.

WHY KYK?

Why KYK stands apart? A legacy shaped by time! Trust built, choice made!

Why we chose the easy path? The weight of time spent walking one road. Why we chose accumulation over trends? A company built on standards before names. Trust that grows stronger with time. In the end, a choice that lasts.

Medical Device

KYK alkaline water ionizers are approved as medical devices in the Republic of Korea. These products are approved as water that may help relieve four major gastric symptoms, including indigestion, excess stomach acid, chronic diarrhea, and abnormal fermentation in the stomach. As medical devices, KYK alkaline water ionizers are manufactured under stricter quality control standards. They meet international requirements, including U.S. FDA registration, CE marking in Europe, and ISO 13485 certification for medical device quality management systems.

Clinical study

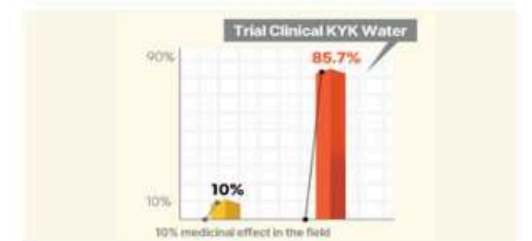

Since its establishment in 1980, KYK has specialized exclusively in the development and manufacturing of alkaline ionizers. Through 21 gold medal-winning inventions, numerous patented technologies, and a long history of scientifically validated research and academic publications, KYK has built both technological expertise and strong scientific credibility. KYK alkaline ionized water systems have been evaluated through clinical studies conducted in collaboration with Seoul National University Hospital, following IRB approval. These studies were conducted in accordance with academic and ethical standards, and their methodologies and outcomes were subject to independent scientific review. In a clinical study involving patients with irritable bowel syndrome, two groups were observed—one consuming regular water and the other consuming KYK alkaline hydrogen water. The KYK alkaline hydrogen water group demonstrated an 85.7% response rate. The results of this research were published in the international medical journal Hindawi.

Seoul National University Hospital Hindawi's paper on clinical trials of Kim Young-Gwi's Hwanwonsu(2018)

Trial clinical KYK Water

KYK's technology has been evaluated through such collaborative Clinical studies with university hospitals, and the data accumulated from this research continue to be reflected in product development and ongoing technological innovation. The scientific data obtained through university hospital-based clinical research forms the foundation of KYK's long-term commitment to advancing technology and delivering reliable products.

Wherever Water Flows, KYK Follows.

Since 1980, Advancing Water Technology, KYK's business categories are not shaped by market trends, but by four decades of continuous evolution in water technology. From home to commercial and industrial applications, the environment may differ, but the technology remains one. Precise control, nature-aligned processes, and long-term stability. This consistency is the foundation of KYK's trust and the reason every category moves as one brand.

Innovative Water Solutions for Home & Industry

Alkaline Water Ionizer
Medical-grade drinking water

Hydrogen Water Generator
Water enriched with high-concentration hydrogen

Water Filter
NSF-certified, EPA-registered filtration process

Industrial Systems
Commercial & industrial solutions

Our Core Water Solutions

Alkaline Water Ionizer
Medical-grade drinking water balances minerals and supports digestive health

Hydrogen Water Generator
Advanced technology that instantly enriches water with high-concentration hydrogen

Water Filter
Safe and certified filtration system that removes harmful substances while preserving minerals

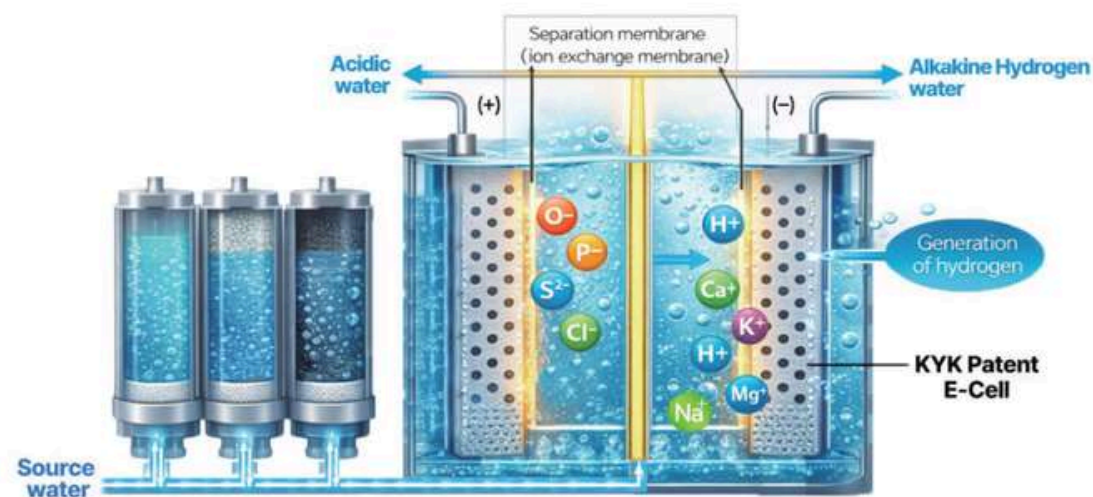

Industrial Systems
Scalable water treatment solutions for commercial industrial applications

Inside KYK Technology: Patents, Engineering, and Scientific Proof

Since 1980, KYK has focused exclusively on the science of water technology, developing and manufacturing its own proprietary systems. Let me introduce the core patented innovations that define KYK's engineering excellence.

Principle of KYK Alkaline Hydrogen Water System

1. The Core of KYK Technology: Our Patented Electrolysis Cell

Combining precise pH control, deep ORP (-mV), and High hydrogen concentration (ppb) is not easy. KYK succeeds with its patented electrolysis cell design. It delivers excellent efficiency and functionality, with outstanding durability and performance

2. Ultra-Precision PCB for All Global Water Conditions Engineered for Every Drop: 4,000 step Control System

Water quality and pH differ in every country. This is why a single fixed setting cannot deliver optimal performance everywhere. With KYK's engineer mode, the system allows 4,000-step fine control of current and voltage to perfectly tune the final pH, ORP (-mV), and hydrogen concentration (ppb) for each installation environment.

3. Removes 99.9% of Microplastics

Microplastics are a major global concern for human and environmental health. KYK Alkaline Water Ionizers remove 99.9% of microplastics, verified by internationally accredited labs. For those who choose healthier water, KYK provides globally trusted ionizer technology engineered to remove microplastics with proven safety and performance.

4. KYK Dual-Cell Technology: 12 & 14 Plate Power

KYK Dual-Cell Technology: 12 & 14 Plate Power
KYK's unique Dual-Cell Technology outperforms conventional plate-count designs. While many companies focus on expanding the number of plates, KYK's dual-cell system offers a versatile range of configurations, accommodating anywhere from 5 to 11 or even 12 & 14 dual-chamber plates. This thoughtful approach not only enhances performance but also prioritises safety.

5. pH 2.5–12.5: Achieved with Pure Electrolysis

KYK adds nothing—no salt, magnesium, or chemical boosters. Our engineering alone delivers the full pH 2.5–12.5 range with rich hydrogen and stable ORP. It's the result of decades of expertise and KYK's uncompromising technology philosophy.

RE 3 - Premium Alkaline Water Ionizer

RE3 is KYK's premium alkaline water ionizer, designed to complement modern kitchens with its smooth, nature-inspired curves and refined materials. Featuring a rare triple built-in filtration system, including a nano filter, RE3 delivers superior water taste and quality even in challenging water conditions. With support for 5, 7, and 9 plates, as well as an optional 12-plate double chamber system, RE3 represents the next-generation standard of KYK alkaline water technology.

RE3 (KUF)

RE 3 - 9/11 Hybrid Plates

Color : Silver, Gold, Blue

Size : 314(W)× 425(H)×124(D)mm / 7kg

Filter : 1st : 9,000L 2nd : 9,000L 3rd :10,000L

E-cell : KYK Patented Solid Hybrid 9/11 Plates

Type : Top sink, Under sink

pH : 2.5 ~12.5

ORP : -350 ~ -850mV

ppb : 1000~1600

MRP: ₹ 2,60,000 (9) | ₹ 3,00,000 (11)

Triple Filters

KYK 30000 series - Alkaline Water Ionizer

The KYK 30000 Series represents the most proven and time-tested alkaline water ionizers in the KYK lineup, refined through years of real-world use. Featuring a wide 7-color LCD display and a stable dual-filtration system, it delivers well-balanced water quality and consistently high user satisfaction. Built on continuously updated core technology, the 30000 Series serves as KYK's most reliable standard platform, offering flexible front-panel customization to suit different markets.

Generation 2 K1

KYK 30000 Series

- Color : K1, 33000, Gen2, Ocean Line
- Size : 340(W)×340(H)×150(D)mm/ 7kg
- Filter : 1st : 8,000L 2nd : 10,000L
- E-cell : KYK Patented Solid Hybrid 7 Plates
- Type : Top sink, Under sink
- pH : 2.5 ~12.5
- ORP : -350 ~ -850mV
- ppb : 1000~1600
- MRP: ₹ 2,30,000 (7)

Healing Starts With Water.
And With You

“ Small, Simple, Loved ”

KYK Hisha is a compact and attractive minimalist alkaline water ionizer, designed in an A4-sized form factor. Its small footprint makes it especially popular among single-person households and compact kitchens, fitting naturally into everyday living spaces without visual or spatial burden.

With a single-filter system, Hisha reduces replacement costs and simplifies maintenance, focusing only on the essential functions users truly need. Lightweight and easy to install, the compact design allows for convenient relocation and setup, making it ideal for apartments, studios, and flexible living environments.

KYK-Hisha - Alkaline Water Ionizer

Size : 222(W), 322(H),100(D) = 4kg **Filter :** 6,000L

E-cell : 5 or 7 Solid Plates

MRP: ₹ 1,40,000 (5) | ₹ 1,60,000 (7)

KYK 777 - Instant Hot & Cold Alkaline Water Ionizer

The KYK-777 is KYK's high-end premium alkaline water ionizer, recognized for its exceptional design and technology, and exhibited at the Louvre Museum in France. It instantly produces hot and cold water without storage, while offering alkaline ionized water adjustable from pH 8.5 to 10.0 for both drinking and cooking. Designed with an automatic hygienic outlet and a glossy gold finish inspired by natural curves, the KYK-777 elevates any kitchen with refined luxury and functionality.

Size : 300(W)×487(H)×465(D)mm, 20kg

Filter : 1st : 8,000L 2nd : 8,000L 3rd : 10,000L 4rd : 10,000L

MRP: ₹ 4,50,000

| Alkaline Water Ionizer - Faucet

Next-Generation Smart Faucet KUF

Compact. Durable. Medical-Grade Performance.

Can be installed with only 4.5cm space!

180°

Ultra-Slim Installation : Only 4.5 cm Required. Fits almost any countertop with minimal space.

180° Arch Swing System: Left-right rotation for perfect usability in any kitchen layout.

Premium Zinc-Aluminum Alloy Body : Not plastic. A corrosion-resistant metal engineered for durability and long-term reliability.

One-Touch Digital Control: Instant selection of alkaline, purified, and acidic water through a clean digital interface.

Designed for Under-Sink Ionizer Integration: Optimized for KYK water ionizers to maximize kitchen space and enhance the premium look.

MRP: ₹ 2,80,000 (Alkaline) | ₹ 3,35,000 (Hydrogen)
(Also Available in Antique Gold & Matte Black)

And With You

Premium Smart Faucet

one-touch system

It's not plastic. Instead, it's a new material that boasts durability and is resistant to corrosion. Available in Chrome, Matte Black, Antique Gold

Hydrogen Water Generator

KYK - Hydrogen Water Generation

The KYK Hydrogen Water Generator is an instant hydrogen-generation system that produces and dissolves hydrogen into water as it flows through the unit. Using KYK’s proprietary technology, extremely small hydrogen molecules are generated quickly and efficiently, enriching water with dissolved hydrogen in real time.

The system applies PEM (Proton Exchange Membrane) electrolysis, generating hydrogen directly within the water while separating and discharging ozone. It operates without a storage tank and does not rely on magnesium reactions or external hydrogen gas injection. By eliminating intermediate storage and injection steps, KYK ensures consistent hydrogen concentration and stable water quality.

Designed for real-world drinking conditions, the system delivers a sustained hydrogen concentration of approximately 1,000–1,600 ppb. Rather than focusing on momentary peak values, KYK emphasizes stability, safety, and practical performance. Built on decades of expertise in water treatment and electrolysis technology, KYK provides reliable hydrogen water for everyday use.

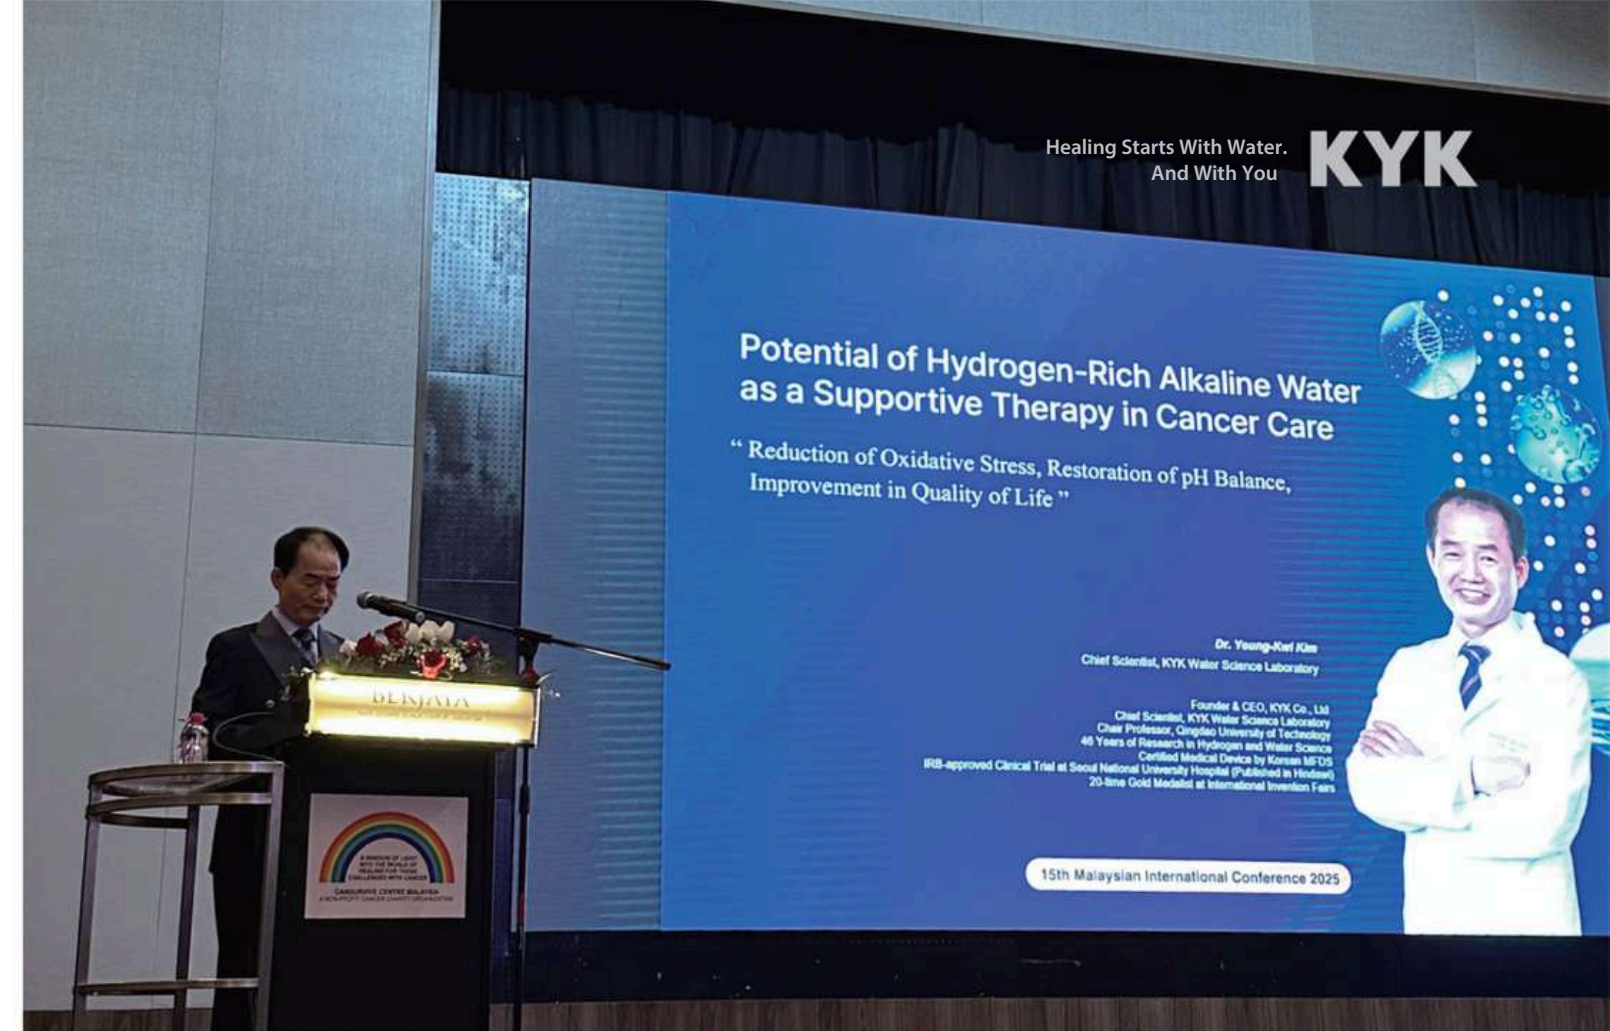

Higen2+

Portable Hp100

Hym3+

The New Water of the Wellness Era

Hydrogen water generators are installed in home kitchens as a replacement for bottled water, while also being introduced as a next-generation premium drinking water in wellness spaces and professional events.

Hydrogen-Rich Water Introduced at International Conferences

- Presented at international conferences in 2025
- Shared KYK’s approach to hydrogen-rich water and the role of water in daily life
- Introduced by KYK Founder Kim Young Kwi, a water specialist since 1980
- Focused on how everyday water choices relate to balance and daily condition

Benefits of Hydrogen Water

- Smooth, light drinking experience
- Comfortable to drink during exercise
- Balanced everyday hydration
- A healthier water choice for daily life

Higen2+ K1 - Hydrogen Water Generator

Water from the world’s longest-living regions shares one common characteristic: it is naturally rich in hydrogen. Hydrogen, the smallest element with atomic number one, is pollution-free and has been gaining attention in the wellness and health fields.

Scientific studies continue to explore its role in binding with reactive oxygen species and being safely released from the body. HIGEN2+ goes beyond simple water purification. It transforms everyday drinking water into a premium wellness choice, designed for modern lifestyles. Ideal for wellness centers, senior living communities, and premium health spaces, HIGEN2+ represents a balanced and refined approach to hydrogen-rich water.

Key Features

- PEM Hydrogen Generation System
- Dual High-Capacity Filtration
- Smart LCD Display
- Flexible Installation (Under-Sink & Countertop)
- Up to 1000–1600 ppb Hydrogen BPA-free Tritan electrolysis chamber with a tankless, contamination-free design.

Higen2+

MRP: ₹ 2,50,000

Hym3+ - Hydrogen Water Generator

KYK has been dedicated to the study of water, continually rethinking the role water plays in everyday life. Built on decades of expertise, KYK has created water enriched with hydrogen, focusing on a refined and balanced drinking experience.

Designed by water specialists, this hydrogen-rich water offers a smooth and light taste. The HYM3+ model reflects KYK’s commitment to quality, supported by ISO 13485, FDA, and CE certifications that ensure reliable manufacturing and process standards. Engineered at the molecular level, HYM3+ redefines the texture of water, combining premium craftsmanship with a three-stage filtration system, including a nano filter, to deliver highly purified hydrogen-rich water for daily use. Inspired by natural curves, the design of HYM3+ blends minimalism with organic form. It complements any space or kitchen, enhancing both modern and natural interiors with quiet elegance.

Key Technologies of HYM3+

- Instant generation of hydrogen-rich water without a storage tank
- Advanced technology that separates and discharges ozone for stable water quality
- High-quality PEM technology that enhances the balance and taste of hydrogen-rich water
- Electrochemical hydrogen generation without hydrogen gas injection or magnesium reactions
- Up to 1000–1600 ppb Hydrogen BPA-free Tritan electrolysis chamber with a tankless, contamination-free design.

Hym3+ Gold

MRP: ₹ 3,00,000 (Silver) / ₹ 3,15,000 (Gold)

And With You

KUF -Undersink / UTC Hydrogen Water Generator

- Dive into the Wonders of Our Cutting-Edge Water Dispensing Marvel: Sleek Aluminum Hairline Front Panel: Because style matters!
- KUF (Premium Edition): Your water genie, serving up:
 - Weak hydrogen water
 - Strong hydrogen water
 - Purified water
 - Disinfected water
- Higen3 (Standard Edition): Offering:
 - 2 levels of hydrogen water
 - Purified water
 - Ozone Water
- Supercharged Tritan E-cell System (KUF)
- Electrolytic Cell: Conjures hydrogen water with up to 1,770 ppb of dissolved hydrogen, no ozone & no artificial mg.
- Patented Hydrogen Magic: No artificial Mg or ozone, and no storage tank needed.
- Audio Feature: Toggle it on or off at will.
- Monitoring System: Keeps an eye on usage, time, and filter health for peace of mind.
- Self-Cleaning Prodigy

KUF Hydrogen

The Trio of Premium Filters: Guarantees clean, scrumptious water every time!

MRP: ₹ 3,35,000

Repia 88 -Hot & Cold Alkaline Hydrogen Water Purifier

The REPIA 88 was developed based on the structure of hot and cold water purifiers, incorporating **KYK's patented porous reduction catalyst technology**. Unlike electrolysis-based systems, REPIA 88 does not use electrical decomposition. Instead, water gains its reduced characteristics as it passes through the proprietary porous catalytic media, enabling stable reduced water production without electrodes or high-voltage control. This structure makes REPIA 88 especially suitable for environments that require continuous operation, large water flow, and high system stability, such as hot and cold water dispensers, offices, hospitals, and commercial facilities.

By eliminating electrode wear and complex electrical control, REPIA88 reduces maintenance requirements while maintaining reliable performance over long-term use. REPIA88 represents KYK's alternative approach to reduced water, designed for applications where electrolysis is not the most efficient solution.

Repia 88

Size : 28x38x52(cm) wt. 15kg
Cold : 4°C~12°C **Hot :** 70°C~90°C
Filter life: 1 Year
MRP: ₹ 1,49,000

KYK Alkaline Hydrogen Water Routine

1. 06:00 – Wake Up

A glass of alkaline water to start the day - pH 9.0
The first thing after waking up is a glass of alkaline water. It gently replenishes hydration after rest and helps set the rhythm for the day. Lukewarm water, not cold, feels the most comfortable.

2. 06:30–07:30 – Gym & Exercise

Alkaline Hydrogen water during workouts - pH 9.5
During exercise, water is not restricted. Alkaline water at pH 9.5 is carried in a bottle and sipped freely throughout the workout. It feels light even when consumed frequently, making it suitable for intense activities such as boxing or football.

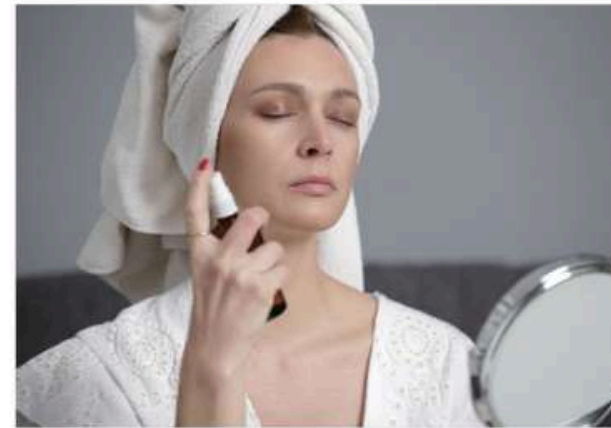

3. 07:30–08:30 – Breakfast Preparation

Different roles for acidic and alkaline water
Breakfast starts with water. Eggs are boiled in acidic water (pH 4.5) for easy peeling, strawberries are washed with alkaline water (pH 10.0), and coffee is brewed with alkaline water (pH 9.5) for a smoother taste. Simply changing the water helps bring out the natural flavors of ingredients.

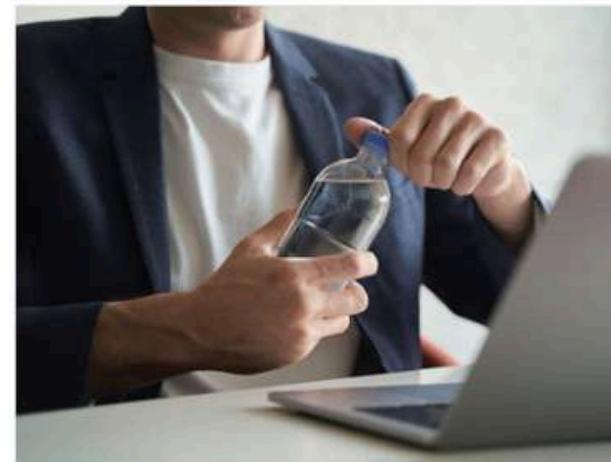

4. 08:30 – Getting Ready for the Day

A refreshing finish with acidic water mist- pH 5.5
Before going out, acidic water is lightly sprayed on the face using a mist bottle. Like the final step of skincare, it is a simple and gentle home-care routine. Morning preparation feels fresher and more comfortable.

5. 10:00 & 15:00 – During the Workday – ppb 1000

Refreshing breaks with pocket hydrogen water
At work, the pocket-sized HP100 comes out. By connecting it to a bottled water container, hydrogen-rich water is prepared for a short break. Once in the morning and once in the afternoon, a small moment of refreshment is chosen instead of coffee.

6. 18:00–21:00 – Dinner & Evening Routine

From cooking to scalp care
After work, water once again takes on different roles. Soup is prepared with alkaline water—pH 10.0 for deeper flavor, while noodles are cooked in acidic water—pH 4.5 to improve texture. After meals, supplements are taken with alkaline water—pH 9.0. Before bedtime, hydrogen water is used for gentle scalp care, bringing the day to a close.

7. 23:00 – Before Sleep

A warm glass of water by the bed -pH 9.5
Before sleeping, a warm glass of alkaline water waits beside the bed. It is the quietest habit of the day, a calm way to end the rhythm of daily life. Water stays with you until the very last moment.

“Drinking water” every day

The human body is made up of more than 70% water. Your health will depend on what kind of water you fill it with. Warm water is more effective for absorption. If you increase the amount you drink little by little every day and drink more than 2.5 liters a day, you will feel a difference in your body.

pH9.0

The Key to “Delicious Cooking” Lies in Alkaline Water

When preparing grains, opt for strongly alkaline water. This method enhances nutrition and aids digestion by generating “amylase.”

pH10.0

For richer meat soup flavor, use alkaline water.

If you want to upgrade the taste of meat soup or vegetable soup, cook it with strongly alkaline water. Strongly alkaline water goes well with vegetables and meat to create wonderful dishes.

pH10.0

Coffee and Tea

For a savory coffee flavor, use alkaline ionized water. Alkaline ionized water, which is rich in minerals, allows you to feel the aroma of savory coffee. If you use alkaline water when brewing tea, you can enjoy a richer aroma and a softer tea taste.

pH9.5

When boiling vegetables

Blanch or soak vegetables in mineral-rich alkaline ionized water. Vegetables with delicious water will be fresher and more nutritious.

pH10.0

Pesticide removal from fresh vegetables

Organophosphorus pesticides are quickly removed by alkalinity. If you soak it in strong alkaline water and wash it in through water, its freshness increases and you can store it for a long time.

pH10.0

When you need to boil it for a long time

To enhance the flavor and potency of the soup, simmer it for an extended period and utilize strong alkaline water to brew the root. This process will result in a more intense taste and effect.

pH10.0

My pet's drinking water

Please use alkaline water as your pet's drinking water. This improves digestion and eases the intestines, making your dog's condition better. Alkaline water rich in minerals also helps your pet grow.

pH9.0

Crispy fried batter is acidic water

Crispy fried food is a dish loved by people of all ages. Try using acidic water in your dough. You can feel the divine taste of fried food.

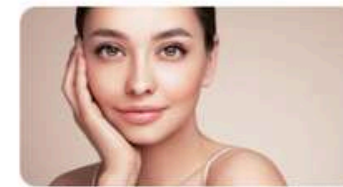

pH4.0

Boiled egg

Boil eggs in highly acidic water. The firmness of the whites becomes stronger, it makes peeling eggs easier.

pH4.0

Acidic Water: Skin Astringent Effect

Try using acidic water when washing your face. Fill a spray bottle with acidic water and use it as a toner. This method is highly effective for achieving a converging effect. Specifically, it helps to calm acne and other skin issues. It serves as an excellent natural remedy for alleviating skin allergies and itchiness.

pH4.5

Safely clean kitchen utensils

Acidic water is the safest way to clean children's toys and kitchen items. Wash under running water with strong acidic water. It is clean and safely sterilized without using any other chemical materials.

pH4.0

Pet “fur” care

Please use “acidic water” for pet hair. When taking a bath, rinse with acidic water at the end. Spray acidic water before and after your usual walk. It helps in maintaining shiny fur.

pH4.0

Plants and flowers leaves

Give acidic water to tree-type plants. Also, spray acidic water spray to prevent pests and diseases on the beautiful flower and leaves.

pH5.0

Purify water “How to use”

When taking antibiotic pills, drink purified water. For the medicine to be more effective, you must drink plenty of water.

Purify water
